

Chapter -12: the manner of execution of subsidy programmes, including the amounts allocated and the details of beneficiaries of such programmes;

The general public is hereby informed that EESL is a joint venture company of four public sector enterprises and is a commercial entity under administrative control of the Ministry of Power, Government of India. EESL does not run its energy efficiency schemes on a subsidy model.

The funds, which are used by EESL, are either generated by means of commercial activities, centered towards public good, or through funding received from various international multilateral agencies.

How are EESL's services so cost-competitive when there is no subsidy involved?

That is an interesting question that many of our consumers pose from time to time. It is pertinent to note that EESL in its own accord does not provide a subsidy to the general public in its schemes. All the schemes run by EESL adopt a demand aggregation model, wherein bulk procurement ends up drastically reducing the price of the commodity or the service, and the final benefit in cost is also passed on to the end consumer or members of the general public (consumers).

Discretionary and non-discretionary grants/ allocations to State Government/ NGOs/ other institutions:

EESL carries out activities under its Corporate Social Responsibility mandate.
