## PROGRAM OBJECTIVE

Energy Efficiency Services Limited (EESL), is a Joint Venture of four Public Sector Undertakings (PSUs) setup under Ministry of Power to facilitate implementation of energy efficiency projects in India. The primary objective of the National Motor Replacement Program (NMRP) is to address the financial barriers faced in replacement of inefficient motors & accelerate the adoption of Premium Efficiency (IE3) motors. The program aims to address the following issues to replace with energy efficient motors.

1

**90%** of the current installed stock of motors is at IE1 and sub-IE1 levels resulting in huge inefficiency in the system.

2

**Old** motors which are rewound multiple times over the years (each rewind reduces motor efficiency by approx. 1%).

3

Inefficient motors running in system more than **15** years old.

## PROGRAM HIGHLIGHTS

## GEF-6 PROJECT & NMRP

Currently, EESL is executing a Global Environment Facility (GEF) project "Creating and Sustaining markets for Energy Efficiency" with the support of United Nations Environment Programme (UNEP) and Asian Development Bank (ADB). With significant energy savings opportunity in motors being the industrial prime movers, this GEF project is supporting the nation-wide NMRP of deploying 40,000 nos. of IE3 motors of different ranges.

## **R**etrofit of **A**ir-conditioning to improve **I**ndoor air quality for **S**afety and **E**fficiency

### **EESL's Corporate Office Pilot Implementation**

Poor and rapidly deteriorating air quality have been a key concern for India for the past few years. It has also come under spotlight with the spread of the COVID-19 pandemic, which affects the respiratory system. As people return to their offices and public spaces, maintaining good indoor air quality is critical for their comfort, well-being and productivity, along with the overall public health. In that context, EESL has undertaken a retrofit of its corporate office air-conditioning and ventilation system. This is a part of a larger initiative - "Retrofit of Air-conditioning to improve Indoor air quality for Safety and Efficiency" developed in partnership with U.S. Agency for International Development's (USAID) MAITREE programme. EESL's corporate office in Scope Complex has been taken up as a pilot for this initiative. The pilot focuses on improving indoor air quality (IAQ), thermal comfort, and energy efficiency (EE) in EESL office's air conditioning system. The key measures taken as a part of the pilot are as follows:

- 1. Increased ventilation for dilution and lower CO<sub>2</sub> levels**
  - Fresh air system to be retrofitted for increased outside air
  - Automation for demand-controlled ventilation and economiser operation
  - Treated fresh air unit to be installed to offset the additional cooling load
- 2. Filtration to minimise particulate matter, pollutants, and pathogens**
  - High efficiency electrostatic filters installed in the air handling units (AHU)
  - Ultraviolet Germicidal Irradiation in the AHU
  - Portable air purifiers for spot application in small enclosed office space
  - Ceiling mounted ESP and HEPA filtration units for conference rooms
- 3. Monitoring and display of IAQ and comfort parameters**
  - Installation of high-quality reset certified monitors on all floors
  - Online dashboard and display screen to be installed on every floor after the lift lobby
  - Comprehensive IAQ testing

The retrofit began with the installation of a network of state-of-the-art air quality monitoring system in the first week of June. The main filtration system was installed by the 6<sup>th</sup> of June, and the rest of the installation is currently in progress. The results of the retrofits have been encouraging, with the air quality in the offices improving significantly, through a 90-95% reduction in pollutants. It has also resulted in maintaining a sustained healthy indoor environment. In addition to its corporate office, EESL has also retrofitted air-conditioning and ventilation system in the offices of Minister of State (IC) for Power and New & Renewable Energy and Secretary, Ministry of Power. EESL has also undertaken proactive measures to clean and disinfect surfaces and promote the maintenance of social distancing and wearing masks. These measures have alleviated any potential anxiety that the employees might have about resuming work from office.
